```

graph TD
    Start([Start]) --> 400[Identify the collection of routers for which delay and delay-jitter estimates will be made]
    400 --> 410[Assign preference to each router]
    410 --> 420[For each router pair (Ri, Rj) in the measurements set]
    420 --> 430{Rj preferred over Ri?}
    430 -- Yes --> 440[Re-order the routers in the current router pair]
    430 -- No --> 440
    440 --> 450[End for]
    450 --> End([End])
